

This is being written in support of Indiana's Telephone Privacy law.
I am begging the FCC to let this law stand as it is beneficial to all Indiana residents. I have been registered on the no-call list since implementation, I cannot begin to tell you the relief it has brought me and my family. I cannot tolerate unwanted interruptions in my household, and used to have to put up with anywhere from 10-20 calls a week. It is my opinion that the Indiana law should stand firm improving the quality of life for all Hoosier residents. It is my belief as a consumer that I should have the option of contacting the businesses that are relative to my needs and desires, I do not appreciate being wooed by the rapidly increasing and annoying use of telemarketers...PLEASE consider the wishes of the public when making your decisions.
A concerned citizen..thank you.
